Flitto Live Translation, a real-time AI interpretation solution for your next global event

Flitto Live Translation helps international attendees feel that your event was prepared just for them. It offers an unprecedented level of accuracy in speech-to-text (STT) conversion and machine translation to help you captivate global audiences in your own language.

Why Live Translation?

What makes Flitto Live Translation the right solution for your next event?

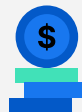

It doesn't matter how big or small your event is.
Flitto Live Translation is a cost-effective and painless alternative to building an interpretation booth from scratch.

Invite globally-renowned international speakers

Leave a lasting impression on international audiences with a tailored experience

Save your budget from expensive interpretation systems and equipment

Where can we use Flitto Live Translation?

Possibilities are endless with Flitto Live Translation, the world's most accurate and effective multilingual translation solution for multiple participants.

Seminars with global audiences

Shows and concerts

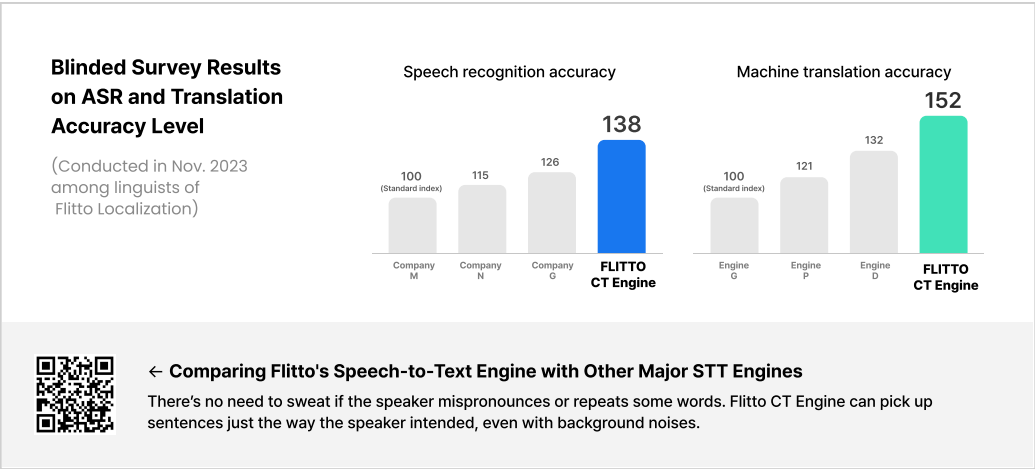

Conferences

Corporate meetings and more

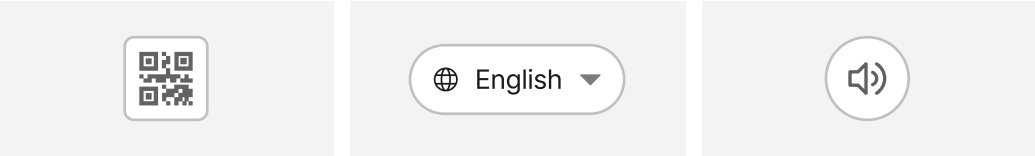

Product Specifications

Flitto Live Translation is powered by a high-performance AI engine trained on top-quality language data, guaranteeing accurate speech recognition and translation results.

How to use Flitto Live Translation

Flitto Live Translation is simple, elegant, and easy to use. The Flitto Live Translation application on the speaker's device converts speech into text, translates it accurately, and sends it to the audience's devices.

Scan the QR code to enter the interpretation room.
No need to install anything.

Select your language, and read the translation on your own device.

Tap the speaker icon to listen to the translation.

Leave no room for mistakes with a two-step filtering system

Inference Filter picks up speech in noisy surroundings and contextualizes phrases even when the speaker stammers.
Editor Mode allows you to correct words and phrases misspoken by the speaker.

Supported languages

Flitto Live Translation supports real-time translation into 38 languages, including English, Chinese (Simplified), Japanese, Thai, Vietnamese, Malay, Indonesian, Arabic, Russian, Spanish, and French.
